

$$w_1 = \int_{\alpha} \omega$$

$$w_2 = \int_{\beta} \omega$$

A hand-drawn diagram of a 2D coordinate system with two intersecting axes. Two points are marked with dots. The point in the upper-left quadrant is labeled with the equation $w_1 = \int_{\alpha} \omega$. The point in the lower-right quadrant is labeled with the equation $w_2 = \int_{\beta} \omega$.
